

TBC.LONDON

WILLMOTT DIXON

SINCE 1852

FORE

Tower Bridge Court

November 2022

On behalf of the entire TBC.London team we hope you, your family and friends are healthy and well. Welcome to our latest construction update which focuses on site communications. This is in addition to our quarterly newsletters.

If you have any questions or need to contact our site team, please email construction@tbc.london or call us on one of the numbers listed below.

COMMUNICATION UPDATE

Willmott Dixon has a designated Resident Liaison Officer working on TBC.London. Joan Gallagher has been with Willmott Dixon for five and half years and has worked on a number of our projects.

Joan is your first point of contact, so if you have any questions, queries, or concerns please get in touch and she will be more than happy to help.

If you see Joan around and about, please do introduce yourself and say hello!

You can contact Joan at construction@tbc.london or call her on 07980 922 222.

MEET THE SITE TEAM

Matt Adams
Senior Operations Manager
07805 787528

Anthony Dowling
Construction Manager
07976 961825

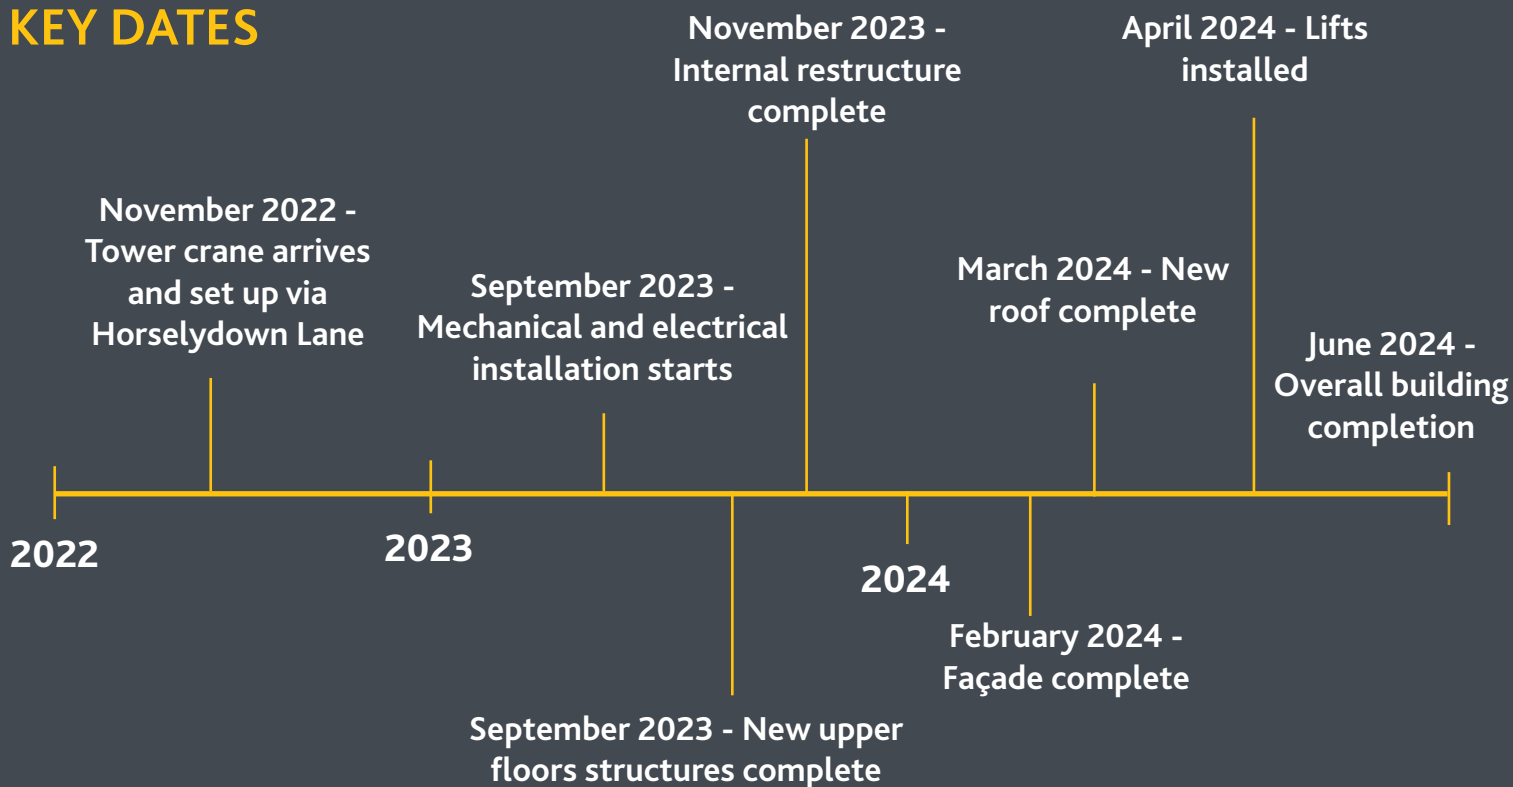

David Green
Senior Build Manager
07972 660745

We will keep all residents informed over the coming months.

If you would like to receive emails directly, please contact us at construction@tbc.london with your full name, email address and consent for your data to be used for this purpose only.

KEY DATES

WHAT'S HAPPENING?

We want to be a good neighbour. While construction is underway, Willmott Dixon will take measures to minimise disruption as much as possible and to keep you informed of upcoming works on site.

The TBC.London Community Liaison Group ("CLG") has been established to ensure meaningful consultation on the development of TBC.London. The role of the Group is to meet monthly and represent the interests of residents and businesses who may be affected by the construction work. The CLG can be contacted via construction@tbc.london

As we're on site, you should see that:

- Works will only take place during the approved working hours of 8am to 6pm Monday to Friday and 8am to 1pm on Saturday.
- We will be undertaking noisy works on a schedule of two hours on, two hours off, in order to reduce disturbance.
- We are using the most modern plant available to reduce noise from machinery. Some hydraulic breaker machinery will be required, but only when absolutely necessary.
- Dust, noise and vibration will be monitored at multiple points on the site perimeter. The project team will be alerted immediately if any of these exceed safe levels and works will be stopped.
- Scaffolding will be encapsulated which will help to contain noise and dust.
